

Kanji reader

A Cross-Linguistic Phonetic Extension
to master the Chinese characters

2026/ 06/26

Necessity & Objective

1/10

Phonetic Divergence

- Japanese, Chinese, and Korean share the same character roots.
- Their pronunciations have diverged significantly over centuries.
- Language learners and researchers struggle to bridge these phonetic gaps.

Project Goal

- **Kanji Reader** was created to provide a unified data bridge.
- The goal is to build an extension tool on web content to show and to simultaneously compare **On-yomi** (JP), **Pinyin** (CN) and **Hangeul** (KR).
